

AT a SPECIAL MEETING of the GARIOCH AND NORTHERN MEDICAL ASSOCIATION, held in INVERURIE, SATURDAY, 12th December, 1868, it was unanimously resolved:—

I.—That the Members of the GARIOCH and NORTHERN MEDICAL ASSOCIATION, having a deep interest in the efficiency of the ABERDEEN INFIRMARY and MEDICAL SCHOOL, feel it a duty incumbent on them to express an opinion on the practice of Homœopathy introduced into the Infirmary.

II.—That this Association well knowing that the Medical Officers of the Aberdeen Infirmary have hitherto been appointed and continued in office with the distinct understanding that their practice was and should continue in accordance with the recognised system of medicine, see no reason why a change from the practice of what has hitherto been considered legitimate medicine should be introduced.

III.—That, in the event of the practice of Homœopathy being continued in the Aberdeen Hospital, the Members of this Association will not feel satisfied in recommending patients for admission to that Institution, to be treated under a system which they consider delusive and hazardous.

IV.—That the Association do not consider that a Charitable Institution like the Aberdeen Infirmary is a place for the purposes of experiment; but, that the sick poor are entitled to all the advantages of the recognised system of medical treatment.

V.—That a copy of these Resolutions be forthwith put into the hands of the President and each Manager of the Aberdeen Royal Infirmary, and that said Resolutions be transmitted to the President of the Medico-Chirurgical Society of Aberdeen, with a request that he would be pleased to present the same to the Meeting of Managers to be held on Monday, 14th inst.

(Signed)

JAMES T. GEORGE, P.

GEO. MACKIE, M. D. Secy.

A faint, light-colored watermark of a classical building with four columns and a triangular pediment is visible in the background.
